Why Reading is important to me?

Reading helps you get better in life. you need to read in Middle school, High school and college I want to go to college so must read daily.

Reading helps your imagination grow. It helps you concentrate on your work and test. If you want to sing you can read about good people who sing. If you want a job you have to read the job's information to see if that job is for you.

There are so many different kinds of things you can do if you know how to read.

You can read chapter books, (comic-books) News paper even things off a computer. Reading is something you must know you must know how to do in life.

Reading will help you (become) a better student. I love to read on grad level because I read (every-day). I hope you learned how reading is important to me and every one ELSE.
